

# Classifying Angles

November-20-13  
9:11 AM

angle: 2 rays that meet @ a point called the vertex

- measured in degrees, with a protractor

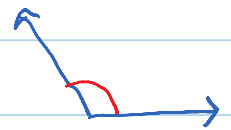

ACUTE  
- between  $0^\circ \rightarrow 90^\circ$

RIGHT  
 $90^\circ$

OBTUSE  
- between  $90^\circ - 180^\circ$

STRAIGHT  
 $180^\circ$

REFLEX  
- between  $180^\circ - 360^\circ$

Refferent angles: angle measures that are estimated  
ex.  $90^\circ$ ,  $45^\circ$ ,  $30^\circ$  and  $60^\circ$

$\frac{1}{2}$  of  $90$   
 $\nearrow$

slightly smaller than  $45^\circ$

bigger than  $45^\circ$   
 $\uparrow$

$\frac{1}{2}$  or 10

than  $45^\circ$
